Precautionary Boil Water Notification

BOIL YOUR WATER BEFORE USING

Condition(s) Requiring Notice

Our water system is issuing a precautionary boil water notice due to the following condition(s): Due to low water usage and demand in water system chlorine residuals have dropped off resulting in unacceptable bacteriological results. Note that chlorine residual levels were within the acceptable TCEQ minimum requirements during this event.

Potential Adverse Health Effects

Due to the conditions, there is a possibility of contamination. Consumption of contaminated water may cause symptoms such as nausea, cramps, diarrhea, and associated headaches.

What Should I Do?

DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all water to a boil, let it boil for one minute and let it cool before using, or use bottled water. Boiled or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and food preparation until further notice. Boiling kills bacteria and other organisms in the water.

What is Being Done?

To ensure the continued safety, reliability, and quality of our water system. Siesta Shores WCID is temporarily issuing a precautionary boil water notice and converting Chloramination disinfection to free chlorination to shock treat the water system. We will resample the system for compliance over the next few days.

We will inform you when we have addressed the cause of the boil water notice and tests show no bacteria are present and you no longer need to boil your water.
